PATENT COOPERATION TREATY

PCT

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

A 1:						
Applicant's or agent's file reference 1966/PCT	FOR FURTHER AC	TION	See Form PCT/IPEA/416			
International application No. PCT/CH2002/000582	International filing date 28 October 2002		Priority date (day/month/year)			
International Patent Classification (IPC) or n A61F 2/44		•				
Applicant						
	THYS MEDIZINAL	TECHNIK AG e	et al.			
 This report is the international prelim Authority under Article 35 and trans 	ninary examination repor	t, established by this cording to Article 36	International Preliminary Examining			
2. This REPORT consists of a total of	5sheets, in	ncluding this cover st	neet.			
3. This report is also accompanied by A	NNEXES, comprising:					
a. (sent to the applicant and	(control)					
sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).						
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.						
b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).						
4. This report contains indications relati	ing to the following items	s:				
Box No. I Basis of the rep	port					
Box No. II Priority						
Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability						
Box No. IV Lack of unity of invention						
Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement						
Box No. VI Certain documents cited						
Box No. VII Certain defects in the international application						
Box No. VIII Certain observations on the international application						
Date of submission of the demand	D	ate of completion of	this report			
24 May 2004 (24.05.20			nuary 2005 (27.01.2005)			
Name and mailing address of the IPEA/EP	A	uthorized officer				
Facsimile No.	Т	elephone No.				

International application No.

Box No	D. I	Basis of the report						
1. With other	n regard rwise in	I to the language, this report is based on the international application in the lang	uage in which it was filed, unless					
	This which	report is based on translations from the original language into the following this language of a translation furnished for the purpose of:	language,					
	international search (under Rules 12.3 and 23.1(b))							
		publication of the international application (under Rule 12.4)						
	international preliminary examination (under Rules 55.2 and/or 55.3)							
J	are not	I to the elements of the international application, this report is based on (in the receiving Office in response to an invitation under Article 14 are referred annexed to this report): anternational application as originally filed/furnished	replacement sheets which have been to in this report as "originally filed"					
X		escription:	•					
	pages	•						
	pages		, as originally filed/furnished					
	pages							
\square	the cl							
	pages	ALLED.						
	pages		, as originally filed/furnished					
	pages	, as afficilled (toget	her with any statement) under Article 19					
	pages		23 December 2004 (23.12.2004)					
	tha de	awings:						
لــا	pages							
	pages	1-3 received by this Authority on	, as originally filed/furnished					
	pages'							
Ш	a sequ	ence listing and/or any related table(s) – see Supplemental Box Relating to Sequ	ence Listing.					
			•					
3	The ar	nendments have resulted in the cancellation of:						
		the description, pages						
		the claims, Nos.						
		the drawings, sheets/figs						
		the sequence listing (specify):						
		any table(s) related to sequence listing (specify):						
	(Rule	eport has been established as if (some of) the amendments annexed to this repsince they have been considered to go beyond the disclosure as filed, as in 70.2(c)).	dicated in the Supplemental Box					
		he description, pages						
		he claims, Nos.						
		he drawings, sheets/figs						
		he sequence listing (specify):						
		any table(s) related to sequence listing (specify):						
		(Jyooy)),						
If item	4 appl	ies, some or all of those sheets may be marked "superseded."

2. Citations and explanations

This report makes reference to the following document:

D1: WO 00/35383 A (DIMSO SA; GAUCHET FABIEN (FR))
22 June 2000 (2000-06-22)

D1, which is considered to represent the prior art closest to the subject matter of claim 1, discloses (the references in parentheses are to this document) (see page 5, line 4 to page 6, line 30 and figures 1-3 and 6):

intervertebral disc prosthesis or artificial vertebra with

- A) an essentially hollow cylindrical base body with an envelope (22) in the form of a bellows, a top end, a bottom end and a central longitudinal axis (14);
- B) an upper apposition plate (6) arranged at the top end of the base body transversely to the longitudinal axis (14), said plate being suitable for resting on the base plate of a vertebra, and
- C) a lower apposition plate (6) arranged at the bottom end of the base body transversely to the longitudinal axis (14), said plate being suitable for resting on the cover plate of a vertebra, and
- D) the envelope (22) in the form of a bellows configured

as a spring element with a defined spring rate.

The subject matter of claim 1 thus differs from the known intervertebral disc prosthesis in that the envelope comprises multiple bellows inserted into each other.

The subject matter of claim 1 is therefore novel (PCT Article 33(2)).

The problem addressed by the present invention may therefore be considered that of improving the stiffness of the spring element.

The solution proposed in claim 1 of the present application involves an inventive step (PCT Article 33(3)) since it is not obvious and none of the search report citations suggests such a solution.

Claims 2-25 are dependent on claim 1 and therefore likewise meet the PCT requirements for novelty and independent step.

Note:

On entering the regional phase, the applicant should take the following points into consideration:

The description should have cited D1 and briefly outlined the prior art disclosed therein.
